

We know the world's changing. And it's time for our industry to do the same. Better products that are made to last from sustainable materials. A commitment from all suppliers to look at their businesses and see how they can do better. Because it'll take all of us to shape a better future for the industry. And we are all in.

Introducing darani™ - meaning tree; ghost gum in the Dharug language. The Dharug or Darug people are the traditional owners of much of the land that is today known as modern day Sydney. They share strong ties of kinship and lived as skilled hunters in family groups or clans.

darani™ - is pleased to introduce our products each of which are manufactured from materials which are sustainable and better for the environment.

Our bags are manufactured from Repreve® material which is a recycled fiber made from plastic bottles that would otherwise be headed to landfill.

Our cutting boards are handmade from Australian Camphor Laurel Timber, which is naturally anti bacterial due to the natural oils in the timber.

We hope you enjoy our products and appreciate your support to help shape a more sustainable future for our industry.
